

Environmental Health and Safety

Fire Watch Definition as per NFPA 1, Section 3.3.125:

The assignment of a person or persons to an area for the express purpose of notifying the fire department, the building occupants, both of an emergency; preventing a fire from occurring; extinguishing small fires; or protecting the public from fire or life safety dangers.

A fire watch is required when a fire protection system fails for more than 4 hours within a 24 hour period (fire alarm and/or fire sprinkler system). The fire watch is required during the periods of occupancy until such reasons for system being down are completed and brought back to full operational service.

Fire Watch Duties for Personnel serving as Fire Watch:

- A) Conduct constant patrols of the entire facility

NAME OF BUILDING: _____
