<b>Doctor of Audiology   University of South Florida</b>	Tampa, FL	August 2015 - May 2019
<b>Bachelor of Science   University of South Florida</b> Major: Biomedical Science Minor: Public Health	Tampa, FL	August 2009 - December 2010

## Research

**Clinical Research | Tampa General Hospital/University of South Florida** November 2020 - Present  
*Effect of Iron Supplementation on Iron Status and Neural Function in Very Low Birth Weight Infants*  
Collected and analyzed ABR data in order to help assess the correlation between total body iron, represented by ferritin and hematocrit levels, and ABR latency in preterm, iron-deficient infants receiving low versus high doses of enteral iron supplementation

**Quality Improvement Study | Tampa General Hospital** August 2020 - April 2022  
*Targeted Cytomegalovirus Screening in a Level IV Neonatal Intensive Care Unit*  
**| Findings presented at 2022 Pediatric Academic Societies Conference |**  
Utilizing the Institute of Healthcare Improvement's Model for Improvement, assisted a multidisciplinary team with the creation of a standardized cCMV screening and follow up protocol in a level IV neonatal intensive care unit.

**Audiology Doctoral Project | University of South Florida** Completed: February 2018  
*Auditory Brainstem Responses for Normal Hearing Adults: Normative Data for University of South Florida Hearing Clinic*  
Collected data on young, normal-hearing participants with no suspected retrocochlear pathology to determine the ABR normative data specific to the equipment in the USF Hearing Clinic
