

UNIVERSITY OF SOUTH FLORIDA

Mathematics

Students will determine appropriate mathematical and computational models and methods in problem solving, and demonstrate an understanding of mathematical concepts. Students will apply appropriate mathematical and computational models and methods in problem solving.

Natural Sciences

Students will demonstrate the ability to critically examine and evaluate scientific observation, hypothesis, or model construction, and the use of scientific method to explain the natural world. Students will successfully recognize and comprehend fundamental concepts, principles, and processes about the natural world.

Social Science

Students will demonstrate the ability to examine behavioral, social, and cultural issues from a variety of points of view. Students will demonstrate an understanding of basic social and behavioral science concepts and principles used in the analysis of behavioral, social, and cultural issues, past and present, local and global.

If a student completes a course in a subject area for which one of the general education core course options in the same subject area is a prerequisite, that student should be considered to have completed the portion of the core in that subject area. In some instances there may be courses similar in content in the general education program that are at a more advanced level, but do not include a core course as a prerequisite, in these instances the more advanced, similar course will be considered to have completed the portion of the core in that subject area.
